Disputes and complaints

The registration and assignment of .nl domain names normally goes very smoothly. Disputes and complaints are rare. The various types of complaint that are sometimes made and the types of dispute that sometimes arise are listed on the left. SIDN does not normally get involved in these cases. The intention is simply to let you know whom to contact if you have a complaint or dispute. Information is also provided about the attachment and seizure of .nl domain names and about domain name jurisprudence.
